a + b

Addition

a - b

Subtraction

$$a \times b$$

Multiplication

$$\text{Area} = s^2$$

Area of a square with side length s

$$\text{Area} = l \times w$$

Area of a rectangle with length l and width w

$$\text{Area} = \pi$$

Area of a circle with ra

$$\tan(\theta) = \frac{\text{opposite}}{\text{adjacent}}$$

Tangent formula in a right triangle

$$\sin(\theta) = \frac{\text{opposite}}{\text{hypotenuse}}$$

Sine formula in a right triangle

$$\cos(\theta) = \frac{\text{adjacent}}{\text{hypotenuse}}$$

Cosine formula in a right triangle

$$\tan(\theta) = \frac{\text{opposite}}{\text{adjacent}}$$

Tangent formula in a right triangle

$$A = l \times w$$

Area of a Rectangle

$$P = 2 \times (l + w)$$

Perimeter of a Rectangle

$$A = \pi \times r^2$$

Area of a Circlesdfsdf
asd

$$P = 2 \times (l + w)$$

Perimeter of a Rectangle

$$P = 2 \times (l + w)$$

Perimeter of a Rectangle
